DuoCloud Gold EA

Setup Guide for Vantage Markets MT5 users

Guide	DuoCloud Gold EA Public Setup Guide
Use with	Vantage Markets MT5, CENT STANDARD STP, USC cents account

This guide explains how to set up DuoCloud Gold EA on your own MT5 account.

Risk reminder: Gold/CFD trading is high risk. Automated trading can lose money. No profit is guaranteed. Use only capital you can afford to risk.

Official website and setup guide

Support: https://t.me/Jitex_s

1. Before You Start

DuoCloud Gold EA is an automated MetaTrader 5 Expert Advisor for gold trading on Vantage Markets. Access is currently available only for users who open their Vantage account through our approved referral path.

Best market conditions

The EA generally works best when gold moves both ways and gives pullbacks. It is more vulnerable during highly volatile news periods and strong one-direction movement without meaningful retracement.

2. Open The Required Vantage Account

Create Vantage account

https://vigco.co/la-com-inv/e6wP0ZIk

1. Create your Vantage Markets account using the approved link above.
2. Open an MT5 account type named **CENT STANDARD STP**.
3. Use a **USC cents account** for the public setup.
4. Recommended account leverage: **1:2000**.

The referral step is required because DuoCloud Gold EA access is currently approved only for users who came through our Vantage referral path.

3. Recommended Account Size

Level	Guidance
Recommended	30,000 USC
Higher-confidence balance	100,000 USC

These are operating-balance guidelines only, not a guarantee of safety or profit.

4. Subscription And License Approval

Subscribe to DuoCloud Gold EA

https://buy.stripe.com/fZu8wR22efvh2655xe3oA0a

- Your first account includes a **30-day free trial**.
- Additional accounts are charged upfront and do not include a free trial. Contact support for additional account access.
- After you subscribe, we verify whether your Vantage account was opened through our approved referral link.
- Once approved, your license key is sent to your email automatically.
- Our license and onboarding emails are sent from **duocloudinfotech.net**.
- Approval is usually completed within 24 hours.

5. VPS And MT5 Setup

For smoother operation, we recommend running MT5 on a VPS instead of a home computer. A VPS helps keep MT5 online continuously and can reduce connection delay to the broker server.

Recommended VPS

https://newyorkcityservers.com/billing/aff.php?aff=848

1. Set up the VPS.
2. Install MetaTrader 5 on the VPS.
3. Log in to your Vantage MT5 account.
4. For a new setup, leave **Algo Trading OFF** until the network connection and EA inputs are configured.
5. Keep the VPS and MT5 running.

6. Allow DuoCloud Network Connection

Before attaching the EA, allow this WebRequest URL in MT5:

https://api.goldea.duocloudinfotech.com

Open Tools > Options > Expert Advisors. Enable Allow WebRequest for listed URL, add the address above, and select OK.

Use this exact network address. The email domain duocloudinfotech.net is not the MT5 connection address.

7. Download And Install The EA

Download latest DuoCloud Gold EA

https://duocloud-ea-download.duocloudinfotech.workers.dev/duocloud-gold-ea/latest

1. Open MT5.
2. Go to **File > Open Data Folder**.
3. Open **MQL5 > Experts**.
4. Place the downloaded DuoCloud Gold EA **.ex5** file inside **Experts**.
5. Restart MT5.
6. Open an **XAUUSD** chart.
7. Attach DuoCloud Gold EA to the chart.
8. Enter your license key and review the inputs using Section 8 on the next page.
9. Complete Section 8 before enabling Algo Trading.

8. Recommended First Settings

Setting	Recommended first value
Trade Both Directions	AUTO
Lot Multiplier	1.0
Trading Hours Control	AUTO
Spike Protection	AUTO
Remote Pause/Close Controls	ON
Daily Profit Target	Optional
Floating Loss Limit	Optional

Do not increase Lot Multiplier until you understand the extra exposure. Higher multiplier increases lot sizes and risk.

Ready to start

After reviewing your license key and inputs, allow Algo Trading in the EA's **Common** tab and select **OK**. When you are ready for the EA to trade, enable the MT5 toolbar's **Algo Trading** button. Check the dashboard for connection or license messages. Keep MT5 and the VPS running while the EA manages trades.

9. Dashboard Controls

Button	What it does
Pause New Entries	Stops new starter trades. Existing active baskets continue to be managed.
Close Trades	Closes EA-managed open trades for the chart/account scope and stops new entries.
Resume Trading	Resumes trading after a local Pause New Entries or Close Trades stop.

Use dashboard controls carefully. They affect the EA on your MT5 chart/account scope.

10. Watch Or Test Before Real Trading

- If you understand the risks, you may start directly on your real Vantage MT5 account.
- If you want to observe first, check the Telegram channel for current investor/read-only monitoring access.
- After license approval, you can start on the included demo account before using real funds.
- Live monitoring access and demo results are for observation only. They do not guarantee future results.

11. Troubleshooting

Issue	What to check
EA does not connect	Confirm the WebRequest URL is allowed in MT5 and internet/VPS connection is working.
License not accepted	Check that the license key was copied correctly and your Vantage referral approval is complete.
License email missing	Check the inbox used for your subscription and its spam/junk folder for email from duocloudinfotech.net. Approval is usually within 24 hours. If you were approved but cannot find the email, or are still waiting after that time, contact support.
No new trades	Check Algo Trading, license status, spread, trading hours, spike protection, and dashboard pause state.
Dashboard says paused	Use Resume Trading if it was locally paused. Contact support if remote controls appear active unexpectedly.
MT5 not running	Keep the VPS and MT5 open. The EA cannot manage trades if MT5 is offline.

12. Support And Billing

Official website and setup guide

https://duocloudinfotech.com/duocloud-gold-ea

Telegram support

https://t.me/Jitex_s

We usually reply within a few minutes. Sometimes replies may take up to 12 hours depending on availability.

Manage subscription

https://billing.stripe.com/p/login/4gM14pcGS2IveSR6Bi3oA01

Use the billing portal to manage your subscription, cancel anytime, view invoices, or pay invoices.

13. Final Risk Reminder

DuoCloud Gold EA is automated trading software for MT5. It is not financial advice and does not guarantee profit. Gold/CFD trading can create fast losses, especially with leverage. Automated trading can be affected by fast market movement, news volatility, spread widening, slippage, broker restrictions, VPS/network delay, market gaps, and insufficient balance or margin.

Use only capital you can afford to risk.
